BILL: _____

Land Management Building

\$2,400,000 is requested to plan, design, construct and furnish a new building for the Bernalillo County Parks and Recreation Department's Land Management section. The Land Management section is comprised of 50+ employees spread out over four crews that are responsible for maintaining all of Bernalillo County's parks and open spaces, in addition to landscaping at other County buildings and within medians. These crews and their equipment are currently located at a 1-acre site at 2400 Broadway SE that is comprised of several disjointed and dilapidated buildings and little covered storage for equipment and vehicles.

In June of 2012, Bernalillo County completed a master plan that re-imagined the existing site to include all Land Management services within one 11,000 square foot pre-engineered metal building that houses administrative offices, plan archives, meeting/conference rooms, bays for each crew and their equipment, restrooms and locker rooms, and main shop. Exterior improvements would include retaining an existing storage building, a new 4,300 covered storage area, paved parking and landscaping. This legislative request is based upon the costs identified in the master plan, including all necessary demolition and utility relocation.
