BILL: _____

South Valley Swimming Pool Bathhouse

\$750,000 is requested to plan, design, construct, rehabilitate, equip, and furnish the bathhouse at the South Valley Pool near Rio Bravo Park. The existing bathhouse was built in the early 1970s and has reached the end of its life span. All systems of the building— plumbing, electrical, roofing, pool filtration, and changing rooms—are woefully outdated and inadequate. Bernalillo County has repeatedly tried to upgrade basic systems but it is apparent that patchwork repairs are insufficient for the comprehensive needs of this building. The existing condition of the bathhouse is such that Bernalillo County may not be able to keep the pool in operation for many more years, thereby forcing existing pool users to other facilities farther from their neighborhood.
